Claim 20, line 10, "apparatus" has been changed to --aperture--.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: One reason for allowance is that the prior art of record, particularly the reference to Verbeek (5,951,540), does not show a swaging apparatus where the segments movably coupled to one another and centrally arranged with respect to a circumferential base and connected to the base by a radial flexure constructed as a beam with the central beam axis aligned with the central swaging aperture. The

embodiment shown in Figure 5 of Verbeek shows that the segments 230a-d are movably coupled to one another by radially extending beams 240a but does not show that the segments are centrally arranged with respect to a circumferential base and connected thereto by a radial flexure beam.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
